Unique Solid Noble Silver Tips:

Tips are solid noble Silver. Not a coating. Provides High Thermal Diffusivity to minimize sticking and charring of tissue. Uses lower power setting. No need to scrape the tips clean. Non-stick properties are retained for the lifetime of the forceps.

Revolutionary Adjustable Dissecting Force:

Surgeons can dial-in their personal preference for the tensile strength. Increase force for stronger control. Adjustable during surgery as needed for grasping, manipulating, dissecting and coagulating. May reduce the number of forceps required during surgery.

Large Print for easy-to-read Length and Tip Size.

Sealed connector compatible with most standard bipolar electro-surgical generators.

Better Intra-Operative Control

Due to ergonomic design combined with the performance of solid noble Silver tip to eliminate hot spots and reduce tissue build-up and real-time adjustable tensile strength.

Ergonomic Design for Balance, Comfort & Control:

Wide variety of styles, lengths, tips. Balanced wide handle for comfort with tactile positioning feedback. Super-hardened tines ensure consistent spring tension. Keyhole forceps features micro-gauge tines for wider field of view. Guides on forceps keep tips aligned and eliminates scissoring.

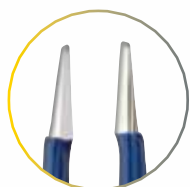

Cost Effective:

Reusable and can be sterilized using standard steam autoclave. No disassembly required.

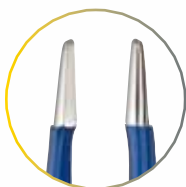

Irrigation Models

Feature inlaid lines into the handle and connector for low profile design. Refer to page 7.

DORO® Non-Stick Bipolar Forceps - Irrigation -

**TRUE NON-STICK
DIRECT TIP IRRIGATION**

Optimal Tissue Manipulation

Streamlined design: Irrigation lines are inlaid into the handle and connector for low profile design for maximum view of field. Irrigation aids in clearing remaining blood from the surgical site and in the evacuation of hematomas. Irrigation also dissipates heat during long procedures.

Model	Length/Style	Tip Size	Item No.
DORO® Non-Stick Bipolar Forceps	22 cm (8.7") Irrigation	1.2 mm	5006-04
